

# ***SPACECREW FINANCE COMPANY - UNAUDITED RESULT FOR Y2022***

# ***SPACECREW FINANCE COMPANY***

During the year of 2022 period, SpaceCrew Finance has maintained the continuous growth trend in loan sales by issuing \$122M loans

Ukrainian MyCredit - the leader of the PDL market in Ukraine, had a net profit of \$4.8M in 2021, but since the start of the war in Ukraine in February 2022, it has recognized a 100% reserve of the loan portfolio, which in 1Q2022 is \$28M US dollars.

Despite the ongoing war, in May 22, MyCredit resumed lending activities based on a strong scoring model and showed results that far exceeded pre-war performance. In October 22, he entered the break-even on a new loan portfolio, but the overall result in 2022 was negative, which we consider force majeure.

At the same time, Asian projects gave a positive result and partially compensated for the losses caused by the war in Ukraine.

# FINANCIAL HIGHLIGHTS FOR 2022

**\$122,1M**

Loans issue

**\$9,5M**

Net portfolio
